

The following pages are excerpts from six (6) different pattern identifiers and matrices that can be used to “jump start” implementation of the PatternSense™ Bias-Blind Behavioral Pattern Recognition Framework (BB-BPRF).

## Flag Definition for Conflict Emergence Patterns

Each category has a definition and description of the three flag levels 0 through 2

**Definition:** How tension and disagreement arise and escalate in the coaching relationship, from healthy disagreement to relationship rupture.

### Flag Levels:

- **Flag 0:** Healthy disagreement, tension recognition, productive friction generating insights
- **Flag 1:** Tension building, challenge escalation, frustration leakage, defensive positioning
- **Flag 2:** Active confrontation, hostile escalation, complete relationship rupture

## Between-Pattern Relationship Symbolology

→	Sequence - Logical temporal progression
↗	Escalate – Intensity building patterns
↔	Overlap – Patterns that logically would co-occur
⚡	Trigger – High-priority immediate cross-checks
⇒	Eliminate – Conceptually incompatible patterns

**“Rosetta Stone” (1 Example)**

<b>Core Coaching Pattern</b>	<b>Telehealth</b>	<b>Sales</b>	<b>Corporate Training</b>	<b>Call Center / Customer Service</b>
<b>Trust Testing Behaviors TS-009</b> (subtle probes to assess safety/credibility)	<b>Safety Checking</b> – "hypothetical" symptom mentions, watching provider reactions	<b>Credibility Probing</b> – technical gotcha questions, competitor name-drops to test knowledge	<b>Expertise Testing</b> – challenging instructor with edge cases, "but in my experience" statements	<b>Agent Competence Test</b> – deliberately complex scenarios, "are you new?" questions

190 Behavioral Patterns (1 Example)

Coach Facing

Category	Pattern Name	Description	Observable Cues	Coach Action	Pattern ID
Innovative Readiness	Creative Openness	Client demonstrates enthusiasm for exploring creative and unconventional approaches to challenges	"What if we tried..." language, excitement about novel ideas, creative brainstorming engagement, openness to unusual solutions	Encourage creative exploration, provide creative frameworks, support innovative thinking development	IR-001

Machine Data

Pattern ID	Data Channels	Detection Notes Signal Features	Action Flag	Weighting	Context Variants	Cross-Ref Codes	Sensitivity
IR-001	Video, Audio, Transcript	Creative exploration language, novel idea enthusiasm, brainstorming engagement, unusual solution openness	0	High	Cultural creativity expression varies; some cultures encourage individual innovation while others prefer collective creative processes	CR-002, CR-004, EN-002, LA-001	Low

## Flag 2 (Crisis/Intervention) Pattern Relationship Map (1 Redacted Example)

### 40 Flag 2 Patterns and Their Critical Relationships

### Trust & Safety Flag 2 Patterns

#### TS-005 Trust Rupture

Pattern	Type	Rationale
TS-006 Hypervigilance	→	Rupture often triggers hypervigilance
TS-010 Complete Shutdown	↗	Can escalate to total shutdown
EN-009 Complete Checkout	↔	Often co-occur
EM-009 Emotional Crisis	⚡	Check immediately for emotional crisis
All Flag 0 patterns	⇒	Eliminates all positive states

## Top 1000 Critical Pattern Relationships

### (1 Redacted Example)

This represents a sample from the top 1000 most critical pattern relationships for implementation, prioritizing crisis detection, escalation prevention, and therapeutic intervention points.

#### Priority 1: Crisis Relationships (Flag 2)

##### Trust & Safety Crisis Patterns

- TS-005 ⚡ EM-009+EN-009+COG-008+ER-009+AT-008
- TS-005 ↗ TS-010
- 
- 
- 
- TS-006 ↔ EM-008+COG-008+ER-010+AT-008
- 
- TS-010 → All Flag 0

## Measurement Frameworks (1 Example)

Emotional Regulation	Pattern Name	Metrics	Methods	Theory Base
ER-001	Emotional Awareness	AFFPM, LAT_ms, SR_wpm, AU12, SENT, NF_hz	Affect Research, Speech Analytics, FACS	Emotional intelligence, Interoception, Mindfulness research

# Category-by-Category Relationships (1 Redacted Example)

Each category follows predictable relationship patterns based on flag levels and behavioral dynamics:

## 1. Trust & Safety (TS) Template

### Intra-Category Relationships

TS Flag 0 patterns (TS-001, , TS-008):

- ↔ with each other (can co-occur)
- → sequential progression (TS-001 → → TS-008)
- ⇨ with all Flag 2 patterns

TS Flag 1 patterns (TS-002, , TS-009):

- → can lead to Flag 2 patterns
- ↔ with similar flag patterns
- ↗ escalation paths exist

TS Flag 2 patterns (TS-005, , TS-010):

- ⚡ trigger checks for other Flag 2s
- ⇨ with all Flag 0 patterns
- ↔ crisis patterns can co-occur

### Inter-Category Relationships

TS → Pattern X (XX): Foundation relationship

- TS Flag 0 ↔ XX Flag 0 (safety enables engagement)
- TS Flag 2 ⚡ XX Flag 2 (crisis cascade)

TS → Pattern Y (YY): Regulation relationship

- TS-004 (Vulnerability) → YY-002 (Emotional Flow)
- TS-005 (Rupture) ⚡ YY-009 (Crisis)

TS → Pattern T (TT): Inverse relationship

- TS Flag 0 ⇨ TT patterns (safety reduces resistance)
- TS Flag 2 ↔ TT Flag 2 (breakdown co-occurs)

TS → Pattern Z (ZZ): Core relational foundation

- TS-001 ↔ AT-001 (safety enables secure attachment) (Continued....)
